## Summary

Software engineer with 4+ years full-time and 3 years part-time experience. Recently focus on front-end technology, especially React, React Native, Typescript/Javascript. Joined several fintech projects in my present job. I was a full stack developer before (Ruby on Rails) and also had work experience in a startup company.

## Work Experience

### LINE Corporation

Kyoto, Japan

FRONTEND ENGINEER

Mar. 2019 - Present

- Tech lead in an eKYC service (frontend team with 3 members), made the decisions for tech stack and frontend architecture. (React, Redux/Redux-Toolkit, Styled Component)
- Created product from scratch and implemented features with team members.
- Coached junior members to solve problems and found the target.
- Made the refactoring plan. (migrated to React Hooks and fixed Redux issues)
- Lead team to fix typing issues during Javascript to Typescript migration, and fit to Typescript guideline.
- Used OpenAPI spec, and applied auto-generated OpenAPI client, created API draft with server teams.
- Created design system with Storybook and built reusable components.
- Discussed design issues with design team in retrospective meeting.
- Built End-to-End Testing flow with Cypress in order to reduce QA team's effort.
- Created CI/CD flow. (Docker, Drone, AWS S3, CDN configuration)
- Did some small open-source contributions for libraries which we are using.
- Improved development experience continuously. (Made enhancement for development environment, such as linter, prettier...etc)

### Anfu Solutions Inc.

Taipei, Taiwan

SOFTWARE ENGINEER

Jan. 2017 - Feb. 2019

- Built first MVP product with Ruby on Rails. (a web service related to real estate market)
- Created the web site architecture with AWS. (EC2, Opsworks, RDS, ElastiCache, SES...etc)
- Built GIS features with PostGIS/Postgres.
- Implemented core product for external bank customers.
- Discussed the requirement of product with customers.

### KerjaDulu

Taipei, Taiwan

SOFTWARE ENGINEER (PART-TIME)

Dec. 2013 - Aug. 2016

- Created new features with Ruby on Rails. (a recruiting web service)
- Refactored web pages with AngularJS.
- Built the architecture to send large amount of marketing emails. (2 millions / day)
- Did some enhancement for SEO. (Sent sitemap regularly, fixed issues for DOM structure and meta tags)
- Help migrate cloud environment from Heroku to AWS.

### Mozilla Corporation

Taipei, Taiwan

ENGINEERING INTERN

Aug. 2013 - Oct. 2013

- Internship program in FirefoxOS team.
- Created unit tests and dev tools for product development.
